SUMMARY

Data-focused Software Engineer with strong expertise in Python, SQL, data visualization, and hands-on experience in building scalable applications and analytical solutions. Skilled in data preprocessing, exploratory data analysis, and developing interactive visualizations using Plotly and modern tools. Experience in writing clean, reusable code and collaborating using Git. Currently expanding into R-based analytics and dashboard development to deliver data-driven insights at scale.

EDUCATION

Lovely Professional University <i>Bachelor of Technology in Computer Science and Engineering – CGPA: 8.05/10</i>	Punjab 2022 – 2026
Jyoti Niketan School <i>Higher Secondary (12th) – Science Stream – 85.4%</i>	Azamgarh 2021 – 2022
Jyoti Niketan School <i>Secondary (10th) – Science Stream – 85%</i>	Azamgarh 2019 – 2020

TECHNICAL SKILLS

Data & Analytics: Python, SQL, Data Analysis, Exploratory Data Analysis (EDA), Data Transformation
Visualization & Reporting: Plotly, Matplotlib, Seaborn, Power BI, Interactive Dashboards
Programming Languages: Python, Kotlin, C#, C++
Machine Learning: Scikit-Learn, TensorFlow, NLP, Computer Vision, Deep Learning
Databases & Tools: MySQL, Git, GitHub, Jupyter Notebook, Google Colab, Jira
Additional: R (Beginner), Data Storytelling, Clean Code, Version Control

EXPERIENCE

Software Engineering Intern <i>LG Soft India</i>	Jul 2025 – Feb 2026 Bengaluru
- Developed enterprise-grade desktop applications using C#, .NET, and WPF, focusing on scalable and maintainable UI architecture. - Engineered reusable, data-driven UI components, improving maintainability and reducing UI defects by 30%. - Implemented accessibility enhancements and optimized workflows, significantly improving usability across user journeys. - Collaborated with cross-functional teams using Git and Agile tools (Jira), reducing review turnaround time by 20–25%. - Designed and standardized UI systems aligned with modern design patterns, ensuring consistency and clean code practices.	

PROJECTS

Netflix Movie Recommendation System <i>Python, SQL, Scikit-Learn</i>	Apr 2025 – May 2025
- Built a large-scale recommendation engine using collaborative filtering on 24M+ records. - Applied SVD for dimensionality reduction, improving prediction efficiency. - Performed extensive data preprocessing, transformation, and model evaluation. - Generated personalized recommendations achieving RMSE of 0.9977. - GitHub: tinyurl.com/5j23zxm6	
Bengali NER System <i>LSTM, GRU, NLP, TensorFlow, Keras</i>	Feb 2025 – Mar 2025
- Developed a hybrid deep learning model (LSTM + GRU) achieving 93% accuracy. - Designed advanced NLP preprocessing pipelines for improved data quality. - Optimized model performance through hyperparameter tuning and experimentation. - GitHub Repository: https://github.com/tinyurl.com/4pdyspr6	

CERTIFICATIONS

Programming Fundamentals in Kotlin – Coursera (Feb 2025) Python for Beginners: Learn Programming from Scratch Bootcamp – Udemy (Feb 2025) Cloud Computing – NPTEL (Nov 2024) – Elite Grade	
--	--

ACHIEVEMENTS

- Solved 800+ DSA problems across LeetCode, GeeksforGeeks, and CodeForces, demonstrating strong problem-solving and algorithmic proficiency. - Achieved Elite grade in NPTEL Cloud Computing certification. - Qualified GATE 2025, showcasing strong core CS fundamentals.
