SUMMARY

Aspiring Software Engineer skilled in Kotlin, C++, Python, Android development, and Data Structures. Experienced in building Android apps, enterprise desktop applications, and intelligent software solutions. Solved 800+ coding problems across competitive programming platforms.

EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.05/10

Punjab

2022 – 2026

Jyoti Niketan School

Higher Secondary (12th) – Science Stream – 85.4%

Azamgarh

2021 – 2022

Jyoti Niketan School

Secondary (10th) – 85%

Azamgarh

2019 – 2020

TECHNICAL SKILLS

Programming Languages: Kotlin, C++, Python, C#

Android Development: Android SDK, Kotlin, XML, Android Studio, MVVM, RecyclerView, Navigation Component, LiveData, Coroutines

Databases & Storage: Room Database, SharedPreferences, MySQL

Libraries & Tools: Retrofit, ML Kit, Git, GitHub, Jira

Machine Learning: Scikit-learn, TensorFlow, NLP, Computer Vision

Core CS: Data Structures and Algorithms, OOP, DBMS, Clean Code

EXPERIENCE

Software Engineering Intern

Jul 2025 – Feb 2026

LG Soft India

Bengaluru

- Developed enterprise-grade desktop applications using C#, .NET, and WPF, focusing on scalable and maintainable UI architecture.
- Engineered reusable, data-driven UI components, improving maintainability and reducing UI defects by 30%.
- Implemented accessibility enhancements and optimized workflows, significantly improving usability across user journeys.
- Collaborated with cross-functional teams using Git and Agile tools such as Jira, reducing review turnaround time by 20–25%.
- Designed standardized UI systems aligned with modern design patterns, ensuring consistency and clean code practices.

PROJECTS

PocketPilot – Personal Finance Companion *Kotlin, XML, Android SDK*

Mar 2026 – Ongoing

- Developed an Android personal finance app using Kotlin, MVVM, Room Database, RecyclerView, and SharedPreferences for expense tracking and budget management.
- Implemented smart overspending prediction alerts, financial health scoring, and gamified savings challenges for intelligent financial insights.
- Integrated ML Kit-based receipt scanning and designed AI-powered financial assistance to enhance automation and user experience.

Food App (Client + Admin) *Kotlin, XML, Android Studio*

Apr 2025 – May 2025

- Developed a Kotlin-based Android food ordering app using Fragment architecture and Material Design for a modular and responsive UI.
- Implemented dynamic menu and cart screens using RecyclerView, CardView, ViewBinding, and custom adapters.
- Enabled multi-screen navigation using Fragments, Intents, and Bottom Navigation with structured model-based data handling.

Weather Forecasting App *Kotlin, XML, Retrofit, REST API, Android Studio*

Feb 2025 – Mar 2025

- Built an Android weather forecasting application using Kotlin and OpenWeather API for real-time data retrieval.
- Implemented REST API integration, JSON parsing, and an interactive UI for weather metrics and city-based search.
- Designed a smooth mobile interface for accurate weather updates and improved user experience.

CERTIFICATIONS

- **Programming Fundamentals in Kotlin** – Coursera (Feb 2025)
- **Python for Beginners: Learn Programming from Scratch Bootcamp** – Udemy (Feb 2025)
- **Cloud Computing** – NPTEL (Nov 2024) – Elite Grade

ACHIEVEMENTS

- Solved 800+ DSA problems across LeetCode, GeeksforGeeks, and Codeforces, demonstrating strong problem-solving and algorithmic proficiency.
- Achieved Elite grade in NPTEL Cloud Computing certification.
- Qualified GATE 2025, showcasing strong core CS fundamentals.
